Environmental Policy	May 2018

Environmental Policy

At space-pod we aspire to act responsibly in minimising the impact of our activities on the environment and to achieve this we will commit to:

- Comply fully with all relevant legislation and the requirements of our customers, stakeholders and interested parties and whenever practical meet or exceed industry best practice on environmental issues.
- Work in line with our ISO14001 Environment Management System to ensure continual improvement and prevention of pollution.
- Promote and communicate this policy throughout the company, and ensure that all staff receives environmental training appropriate to their role and responsibilities.
- Promote our aims and aspirations with our Customers, Consultants, Subcontractors and Suppliers and strengthen relationships with those whose aspirations complement our own.
- Minimise waste and make efficient use of energy and materials on our sites and in our offices.
- Segregate waste for recycling or reuse whenever conditions permit, or to otherwise use waste handlers that sort and recycle waste, reducing the quantity of waste sent for landfill or incineration.
- Minimise pollution risks on our sites, adopting the requirements of Environment Agency Pollution Prevention Guideline 6 “Working at Construction and Demolition Sites” as a minimum standard required for all site that are under our control.
- Recognise the benefits of responsible purchasing; preferring to use alternative materials, products and services with reduced environmental and/or social impacts whenever these can be commercially justified.
- Recognise that we have an impact on the communities and local environment in the areas in which we work, and to manage our activities to minimise their effects with particular regard to noise, dust, litter, mid, transportation and parking.
- Maintain a modern well-serviced and efficient fleet of vehicles, promote good driving practice to minimise the use of fuel, and encourage the use of alternative forms of transport.
